DETAILED ACTION

1. Applicant's request for Pre-Appeal Brief Review filed on 12/27/2006 has been fully considered, and the rejection has been withdrawn.
2. Claims 1-20 are pending. (NOTE: Claims 11-20 are withdrawn from consideration as non-elected invention).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Tao et al. (US 2005/0008965 A1).

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Similarly, the sulfated compounds of current invention are described in US 6,448,435 to Jacobson, et al., US 4,177,345 to Schweiger, US 4,318,815 to Tyler, and US 5,750,656 to Myers (page 7, line 8 of current specification).
